

CONSERVING WATER IN APARTMENTS & DORM ROOMS

Water conservation is a responsibility all West Texans share. Whether you're planning to live here full time or for just a few semesters, do your part to help conserve our most precious and vital resource on the South Plains.

-  **Turn off the tap while brushing your teeth, washing your face and shaving.**
-  **Take shorter showers. You can use from 2 to 5 gallons of water per minute, depending on the showerhead.**
-  **Reuse water whenever possible. Ice can be allowed to melt and water plants. Use water for boiling vegetables or pasta to water plants, after it cools down.**
-  **Make sure there are full loads in clothes washers and dishwashers before operating them.**
-  **Immediately report any leaky faucets and running toilets to your building manager, landlord or residence hall office.**
-  **Turn the faucet completely off after each use.**
